

- HOV Area
- Additional Lane
- HOV Enforcement Area
- Carpool Lots

High Occupancy Vehicle (HOV)

Benefits

- Adds capacity in median - one new lane in each direction
- Most “environmentally friendly” to alleviate congestion
- Promotes carpooling for increased air quality

Why we chose it?

- Most environmentally conscious
- Increases capacity for travel demand - personal mobility & movement of freight (economic development)
- Improves safety, efficiency and reliability

How will we know its successful?

- Use
- Operation at 45mph (approximately 90% of time)
- Other lanes are less congested during operations

*requires time for motorists to acclimate, realize advantages and form carpools

Details

- Peak hour operations (approx. 6-9AM & 4-6PM)
- Regular lane remaining hours
- South Boulevard to 12 Mile Road
- Lane addition M-102 to 12 Mile Road
